Call for Papers

Symposium Fire Safety Design – Structural Fire Engineering

18 September 2018 in Braunschweig

For the fifth time researchers and users meet in Braunschweig to exchange ideas on the latest developments on the topic of structural fire engineering – Eurocode design. Due to the increased demand, the topic of fire scenarios and design fires is given a wider scope. The symposium is an effectively scientific supplement to the Braunschweiger Brandschutz-Tage following directly. As last year, scientists, especially young researchers but also engineers of structural design and fire protection with practical experience in structural fire engineering and numerical simulations will be discussing current problems of the fire safety engineering. In addition to scientific issues, such as experimental investigations, development of new models and research in the field of material properties, the focus of the event should be the application of structural fire engineering.

The symposium will provide an opportunity especially to present the following topics to discuss and exchange ideas:

- Fire scenarios and design fires
- Numerical simulation of fire impact on components and structures
- Numerical simulation of the thermal behaviour as well as the structural and deformation behaviour of components exposed to fire
- High temperature material properties
- Overall structural behaviour under fire exposure
- Validation and verification
- Risk methods and safety concepts
- Application examples of structural fire engineering

Please send an abstract by email to k.bieneck@ibmb.tu-braunschweig.de until 30 April 2018.
The contributions are accepted in German or English language.

Scientific Board

The function of the scientific board is the academic monitoring of the symposium and the assessment of the submitted abstracts and papers.

Members of the Scientific Board are:

Professor Faris Ali, University of Ulster, UK

Prof. Dr. Mario Fontana, ETH Zürich, Switzerland

Prof. i. R. Dr.-Ing. Dietmar Hosser, TU Braunschweig, Germany

Prof. Dr.-Ing. Björn Kampmeier, Hochschule Magdeburg-Stendal, Germany

Dr.-Ing. Christoph Klinzmann, hhpberlin Ingenieure für Brandschutz, Germany

Prof. Dr.-Ing. Martin Mensinger, TU München, Germany

Prof. Dr.-Ing. Peter Schaumann, LU Hannover, Germany

Prof. Dr.-Ing. Jochen Zehfuß, TU Braunschweig, Germany

Participation fee and registration

The participation fee is € 90. It includes the digital available conference documents and refreshments during breaks. It will be charged with the confirmation of your registration and account.

Cancellation is free of charge until 15 August 2018. In case of later cancellation or non-attendance the fee are not refundable.

You are requested to apply in time, preferably online on the website of the Braunschweiger Brandschutz-Tage. Here you receive also further information regarding the event and accommodation in Braunschweig.
